Junior Warden's report

Building safety and structure:

Over the course of 2016 we have started and finished many improvements to the building of St John's, which included: upgrading the lights to LED inside Lyster Hall, replacement of the Rectory sidewalk, painting the shed, placement of smoke and CO detectors in the Church, Hall and Rectory and developing a plan for chair storage and extra counter space. (A big thanks to Vern for that.)

2017 will continue to bring us new challenges and opportunities to improve the safety and efficiency of the Church, Hall and Rectory.

Sincerely,

Michael A Maylone

Junior Warden
St John's Episcopal Church
